

Airothene is a closed cell protective foam which offers superior surface protection without scuffing, scratching or sticking to delicate surfaces. It is an ideal protective wrap or interleaving layer for extra protection.

Due to its unique cellular structure Airothene is both extremely flexible and durable providing excellent insulation and resistance to moisture penetration, protecting contents from moisture damage in humid climates as well as abrasion and impact damage in transit.

Available sizes

Thickness range from 1mm to 20mm.

Widths of 1250mm and 1500mm.

We can slit the rolls into any size required(contact us for more information)

Features and Benefits

- Moisture Absorbent
- Elastic Cushioning
- Non scratch and Water Repellent
- No Tack or Condensation
- FDA Food Approved
- Chemical Resistant
- Non Toxic
- Durable
- Hygienic

Specifications

- **Applications**
Protective packaging
- **Weatherability**
Requires protection against UV degradation if left exposed to sunlight for extended periods
- **Toxicity**
Negligible. Gases given off in the event of a fire are non toxic.
- **Chemical Resistance**
Resistant to most common acids and chemicals.
- **Water Absorbtion**
Minimal, due to closed cell structure, less than 2%.
