

Technical data sheet

CHRYSO® Plast Activator +

Plasticiser - Accelerator

Description

CHRYSO®Plast Activator + is a chloride- containing, a triple action admixture, which accelerates, plasticises and entrains air in dry concrete mixes. It increases strengths up to 30% within 24 hours.

CHRYSO®Plast Activator + enhances the flow properties of dry cement mixes dramatically, resulting in a significant reduction in vibration and cycle times.

CHRYSO®Plast Activator + improves the dispersion of the cement particles which improves the final strength and durability of the concrete.

Directions for use

Use

- Brick
- Block

Dosage

Standard dosage:

- 1.0 kg per 100 kg cement is typical
- Site trials are recommended
- CHRYSO®Plast Activator + can be dosed directly into the gauging water.
- The use of CHRYSO®Plast Activator + is subject to the dictates of the DTU 21 - 4 regulations pertaining to the use of chloride-containing admixtures.

Precautions

If the product freezes, it will regain all it's properties once thawed and mixed thoroughly.

Physical and chemical properties

- Appearance: Light brown liquid
- Density: 1.065
- Colour: Light brown
- pH: 5 - 8
- Freezing point: -15 °C
- Chloride content: ± 12%

Packaging

- 25 ℓ non-returnable containers.
- 200 ℓ non-returnable containers.

Health and safety

CHRYSO®Plast Activator + is classed as an irritant. The use of protective equipment for the skin and eyes is therefore recommended.

In case of spillage mop up with fresh water.
